Free Security Solution From CyberMax Protects

At CyberMax Protects, we're committed to helping protect our customers against cyber risk.

As part of that commitment, we're pleased to provide CyberMax Protects policy holders with up to 10 MDR licenses at no additional cost. All insureds – both small and large – can benefit from MDR protection. CyberMax Protects is here to help you protect your business from costly and disruptive cyber incidents.

What is MDR and how can it help?

MDR stands for Managed Detection and Response. MDR is a 24/7 security guard for your network, data, and devices - desktops, laptops, and servers. It can alert you to threats (like malicious files and links) and stop them from causing harm. It works on a totally automated basis, so you don't have to do a thing. It runs behind the scenes, so it will have no impact on your network. It offers defenses beyond basic computer security features to provide your business with effective protection and peace of mind. Best of all, it's easy to install and it's free!

CyberMax Protects teamed up with cybersecurity experts to provide this incredible benefit to our insureds. Specialists will manage the tool, alert you if there are any threats, and help you to avoid the disruption and expense of a costly cyber-attack.

Download today - it's easy, quick and safe.

This important security tool takes 5 minutes to install, will not interrupt your devices in any way, runs on its own, is free and will protect your network from dangerous cyber criminals and attacks. To get started, just click on the link below and you will be guided through a simple installation – all you need is your CyberMax Protects policy number and your email and phone number. And again, you can install this tool on up to 10 devices – for free!
